Section-I

1.1 Executive Summary

Since independence, providing universal education to all the students have remained the top priorities of all governments. Over the last several decades, this has resulted in a number of legislative and financial initiatives as well. India passed the Right to Education (RTE) Act in 2009, establishing education a basic right and guaranteed free and compulsory schooling and education for children aged 6-14. In addition, the Act specifies age-appropriate enrolment for children, school infrastructure standards, inclusion, and options for community involvement in the educational process. Despite the Ministry of Human Resources Development's (MHRD) recent enhanced focus on skilling and higher education, the RTE remains one of the most essential catalysts for India to realise its long-awaited dream of universal education to all the students. Though RTE Act has successfully managed to increase enrolment in the upper primary level, improved infrastructure norms (like teacher-student ratio, ramps for students with disabilities, provision of drinking water, and availability of a playground etc.), the 25-percent Quota of the school's seats at entry level for economically weaker sections (EWS) and disadvantaged groups (DG) but still it has many things to achieve and require more focus and attention. In RTE, one of the key component was continuous and comprehensive evaluation (CCE) of students which focuses on recognizing learning difficulties of students at regular intervals and adaptation of teaching learning methods accordingly. It was not executed in true spirit by all the states due to which identifying learning difficulties and successive adaptation of teaching methods remained absent.

In order to address the issues related to quality education, AMIED which firmly believes that education plays a significant role in socio-economic development and cultural enrichment of the society and individuals and is working for equal opportunity, irrespective of social status, class, caste, religion and gender in all walks of life especially in the realm of education, to ensure non-discriminatory and equal distribution of grains of development especially that of education. In this respect, they have implemented an education project in five blocks of Alwar district where they have adopted more than 353 villages which are highly dominated by Minority and dalits. This report is the baseline competency assessment of 14 selected government school's students

of Ramgarh and Umrain Blocks of Alwar district of Rajasthan state.

The baseline assessment has been conducted in 14 project schools. A total number of 1005 were present on the day of tests and all of them were assessed in Hindi, English and Mathematics. Based on the marks secured by students they were awarded grade. Grade were given as per the SIQE norms. Grade were given from A+ to D to primary level students and A to E for upper primary level students, where A+ or A is the best performing and D (for primary level) & E (for Upper primary level) is the least performing grade. Following is the summary of findings:

- In none of the category either Class 1 to 5 or class 6 to 8, student's performances were found good. For class 1 to 5, overall percentage of marks secured by the students are between 0% to 40% as none of the them fall under A+ to C. 100% students fall under category D. For class 6 to 8, 71% students (34% girls and 37% boys) fall under grade E (0% - 30% marks) and 29% students (22% girls and 7% boys) fall under grade D (31% -50% marks).
- Mathematics has sent majority students into a cold sweat from class 1 to 8 as it was found to be the most difficult subjects by the students for both the groups. In none of the groups students secured good marks. For class 1 to 5 all students got the marks below 60% and for class 6 to 8 they got the marks of below 50%. 99% of students of class 1 to 5 fall in grade D and 1% students fall in grade C whereas 98% students of class 6 to 8 fall in category E and 2% students fall in category D.
- In Mathematics, for class 1 to 5, 19% students fall in Grade D and 1% in Grade C for Geometry (applicable for class 5 only as it was not applicable for class 1 to 4 for 652; 80% students), in Understanding of Numbers, 97% students fall in grade D, 2.6% in Grade C and 0.1% (only 1) in grade B category, in Calculation part, 97.1% students fall in Grade D, 2.7% in Grade C and 0.2% in grade B (2 students). Application of Calculation is the only section where students fall in all grades. 2% Students (15) fall in grade A+, 6% students (49) in grade A, 12% in grade B, 16% in grade C and 64% in Grade D.
- In Mathematics, for class 6 to 8, students fall in all category in Geometry. 13% students (25) fall in Grade A, 9%(17) in Grade B, 20% in Grade C, 22% in Grade D and 35% in Grade E category. Understanding of Numbers had been the weakest section among students

where 100% students fall in grade E category. Calculation section remained the second weakest section among students where 99% students fall in grade E and 1% (2) students fall in grade D category. Application of Calculation was comparatively the comfortable section for students where 2% (3) students fall in grade A, 7% in grade B, 16% in grade C, 21% in grade D and 54% in grade E category

- Hindi remained as the second toughest subjects for students for class 1 to 5 whereas it was the easiest section for students of class 6 to 8. Majority (97%, 59% girls and 37% boys) of students scored grade D at primary level from class 1 to 5 and only 3% (2% girls and 15 boys) students fall in grade C. For Class 6 to 8, 7.4% (4.8% girls and 2.7% boys) students fall in Grade B, 35.1% (21.3% girls and 13.8% boys) in grade C, 34% (21.2% girls and 12.8% boys) in grade D and 23.4%(8.5% girls and 14.9% boys) in grade E category. This reflects vast propositions for pedagogical interventions in the project area.
- The above figure in Hindi clearly depicts that performance of girls are poorer than the boys for class 1 to 5 as 59% girls and 37% boys fall in grade D category. For Class 6 to 8, for the lowest grade i.e. grade E, girls are better than the boys whereas for other grades boys are better than girls.
- In Hindi, for class 1 to 5, 1% (6) student fall in Grade A, 3% (26) in Grade C and 96% in Grade D for Hindi Reading. In Hindi Writing and Grammar section, students fall in all categories. In Hindi Writing section, 6% students fall in Grade A+, 7% in Grade A, 8% in Grade B, 16% in Grade C and 63% in Grade D category whereas in Hindi Grammar section, only 1%(8) students fall in Grade A+, 3% (27) in Grade A, 7%(55) in Grade B, 13% in Grade C and 38% students fall in Grade D category and 37% students of class 1 and 2 were not eligible for this section.
- In Hindi, for class 6 to 8 students are not limited to only low categories, here they are falling in all categories from A to D. In Hindi Reading section, 21% (39) student fall in Grade A, 19% (35) in Grade B, 22%(42) in Grade C, 23% (43) in Grade D and 15%(29) in Grade E category. In Hindi Writing, 1%(2) students fall in Grade A, 11% (21) in Grade B, 26%(49) in Grade C, 37%(70) in Grade D and 24%(46) students fall in Grade E category.

- In English, for class 1 to 5, 95% students (58% girls and 37% boys) fall in Grade D and 5% students (3% girls and 2% boys) fall in Grade C category whereas for class 6 to 8, students lie between Grade C and grade E. 12% students (9% girls and 3% boys) fall in Grade C, 44% students (26% girls and 18% boys) fall in Grade D and 45% students (21% girls and 24% boys) fall in Grade E category.
- In English, from Class 1 to 5, 0.7% (6) students falls in Grade A+, 0.1%(1) student fall in Grade A, 2%(19) in Grade B, 8% (66) in Grade C and 89% (725) students fall in Grade D category in English Reading section. In English Writing section, 0.4% (3) students falls in Grade A, 1%(8) in Grade B, 5% (43) in Grade C and 93% (763) students fall in Grade D category. In English Grammar section, 2% (13) students falls in Grade A+, 1%(8) students fall in Grade A, 3%(28) in Grade B, 8% (69) in Grade C and 48% (394) students fall in Grade D category. 37% (305) students of class 1 and 2 were not eligible for this grammar section.
- In English, from Class 6 to 8, 1% (2) students fall in Grade B, 17%(32) students fall in Grade C, 31%(58) in Grade D, 51% (96) in Grade E category in English Reading section. In English Writing section, 3% (5) students falls in each Grade A and B category, 14%(27) in Grade C, 43% (80) in Grade D and 38% (71) students fall in Grade E category. In English Grammar section, 9% (17) students falls in Grade A, 3%(6) students fall in Grade B, 6%(12) in Grade C, 20% (37) in Grade D and 62% (116) students fall in Grade E category.

The results of the present baseline survey clearly point to specific interventions that need to be taken up in the programme phase in order to achieve the stated goals of the project. Specific steps need to be taken including:

- Project team needs to focus on all aspects of Mathematics viz. Understanding of Numbers, Calculation, Application of Calculation where the students of all categories are lacking most.
- They should also focus on reading, writing and grammatical skills in both language papers. Activity based learning, development and adaptation of individualised learning plans and use of worksheets are highly recommended.

- Students must be divided into groups based on their current level of understanding. Students can be classified into reading, writing, and functional grammar groups in Hindi and English subjects. When it comes to reading, these levels can range from those who are unable to recognise letters to those who can recognise letters, then words, phrases, and paragraphs, and lastly those who can read and comprehend. The stages of arithmetic vary from number recognition to operations such as addition, subtraction, multiplication, and division. This necessitates individualising instruction and learning for each student.
- In order to help weaker students, schools should establish remedial learning centres. The majority of children's learning results might be improved by improving their abilities and motivation to excel in school.
- Helpful classes for weaker students should be organised in a gradual approach. Teachers, students, and parents should work together to determine the timing and duration of the classes so that all of the weaker students are able to attend on a regular basis.
- For each subject, a more structured lesson plan should be devised so that teachers are equally competent to supervise groups.
- Monitoring of learning level improvement should be the regular activity so that each child should be gauged properly.
- Special attention and emphasis are required during these classes on how to deal with students who have received "D" grade at the primary level (Class 1 to 5) and "E" grade at the upper primary level (Class 6 to 8)
- Teachers' topic expertise should be developed with instructional approaches by Plan International. From the start, school administrators and support staff should be included in training.
- In order to facilitate the teaching-learning process in government schools, proper infrastructure facilities and teaching materials should be supplied.
- HMs and teachers must be sensitised about having a positive mind-set, attitude and behaving in such a way so that fear free learning environment can be created. It will assist in the creation of a conducive learning environment for pupils as well as the improvement of children's learning outcomes.

- It is high time when accountability for the improvement of students should be fixed among the teaching staffs of schools and other line department officials.
- Parent Teacher Meet should also be the part of each quarter. This would undoubtedly provide a platform for parents to express their opinions on their children's areas of improvement, while also aiding in teacher's accountability. This would eventually aid in the improvement of the children's learning outcomes.

Section- II

2.1 BACKGROUND

Alwar Mewat Institute of Education and Development (AMIED) has entered into an agreement with Plan International (India Chapter) to implement an education project in five blocks of Alwar district where they have adopted more than 353 villages which are highly dominated by Minority and dalits. AMIED which firmly believes that education plays a significant role in socio-economic development and cultural enrichment of the society and individuals has been working since its inception towards the equal opportunity, irrespective of social status, class, caste, religion and gender in all walks of life especially in the realm of education, to ensure non-discriminatory and equal distribution of grains of development especially that of education, and thus Knowledge does not necessarily remains confined to only a privileged few. So that they can collectively participate in the process of self-development and development of Nation in general.

Even they faced several challenges in working with such excluded communities to understand and resolve the different perceptions towards them, though they successfully overcome them and today they are successfully doing towards the upliftment of this section of the society especially towards providing the equal and quality education to all. Ramgarh, Kishangarh Bas, Umrain Laxmangarh and Tijara are the five blocks of Alwar districts of Rajasthan covering 353 villages are highly dominated by minority and dalits. Although people associated with AMIED try their best to reach out to the people on the ground and in very interiors of the area but the severity of the problem and bad conditions in all spheres especially educational backwardness of the people of this area further complicates the problem. In addition to all this the geographic condition, poor outreach of governmental services and lack of awareness among people makes it a real challenge for the people of this area.

2.2 Objectives of the Project

Objective 1: To conduct baseline competency assessment of government school's students of 14 schools of Ramgarh and Umrain Blocks of Alwar district.

Objective 2: To assess the knowledge level of students from Class 1 to 8 so that necessary intervention can be done.

Objective 3: To impart training to AMIED staffs.

2.3 Purpose of the Present Study

To increase the achievement and learning levels of all students in this category, the organisation must first establish a baseline of present learning levels. As a result, all of the youngsters must undergo an educational baseline assessment. A list of children and their current grade will be generated by the baseline (which might or might not sit with their school grade). Their educational needs will be assessed, and appropriate support will be offered, based on their present (actual) achievements and learning level, so that they can catch up with their studies and reach the grade level.

Virinchi Development Services, a National level consulting agency has been entrusted to undertake a baseline research to extend its technical support in children's progressive learning levels in selected primary and upper primary schools in the Ramgargh and Umrain blocks of Rajasthan's Alwar district.

Section-III

3.1 Methodology

The purpose of the base line study is to gauge the competency level of 14 government school's students of Ramgarh and Umrain Blocks of Alwar district. The present study will also be helpful to plan further for strengthening the programme implementation.

3.2 Sample of the Study

A total of 1005 students of 14 schools of two blocks of Alwar district were covered who were present on the day of taking the test in the particular selected schools.

Table 1: List of Schools selected for Baseline Evaluation Study					
Sl. No.	Name of School	Type of School	Class Level	Name of Block	Name of Village
1	GPS Goleta	Primary	1 to 5	Ramgargh	Goleta
2	GUPS Choroti Bas	Upper Primary	1 to 8	Ramgargh	Choroti Bas
3	GUPS Kakrali Jat	Upper Primary	1 to 8	Ramgargh	Kakrali Jat
4	GUPS Avaj Ka Bas	Upper Primary	1 to 8	Ramgargh	Avaj Ka Bas
5	GUPS Dumeda	Upper Primary	1 to 8	Ramgargh	Dumeda
6	GUPS Sayyad Colony	Upper Primary	1 to 8	Ramgargh	Sayyad Colony
7	GSSS Jatpur	Senior Secondary	1 to 12	Ramgargh	Jatpur
8	Gsss Bahala	Senior Secondary	1 to 12	Ramgargh	Gsss Bahala
9	GGSSS Ramgargh	Senior Secondary	1 to 12	Ramgargh	Ramgargh
10	GSSS Gundpur	Senior Secondary	1 to 12	Ramgargh	Gundpur
11	GSSS Choroti Pahad	Senior Secondary	1 to 12	Ramgargh	Choroti Pahad
12	GUPS Palka	Upper Primary	1 to 8	Umrain	Palka
13	GSSS Mahuwa Khurd	Senior Secondary	1 to 12	Umrain	Mahuwa Khurd
14	GSSS Kakrali Meo	Senior Secondary	1 to 12	Umrain	Kakrali Meo

In order to increase the accomplishment and learning levels of all children in this category, the organisation must first establish a baseline of each child's existing situation. As a result, an educational baseline assessment of all children is required.

A list of students and their current grades will be generated by the baseline (which might or might not sit with their school grade). Their educational needs will be assessed based on their

present (actual) achievements and learning level and appropriate support will be offered so that they can catch up with their studies and reach the grade level.

3.3 Survey Design, Sampling & Tool Used

Study Universe and Sample Size: In order to conduct the baseline evaluation, the data were collected from the selected classes children studying in the 14 primary, upper primary and Senior Secondary schools of Ramgargh and Umrain blocks of Arwal district. A total number of 1005 children were taken for this baseline evaluation study.

The research team performed a desk review of project documentation, which included proposals, census data, and other study-related documents. The research team developed the tool for conducting baseline evaluations for children attending government schools and used them to conduct the assessment in order to obtain useful qualitative data. The youngsters were assessed in the subjects of Hindi, English, and Mathematics.

Translation of the tools and pre-testing All the instruments of the present survey were translated into Hindi. All the prepared instruments were pre-tested on eligible respondents by the local investigators from survey area. All the questions were assessed for consistency, comfort of the investigator to enquire and the respondent's convenience to respond. The instruments were modified according to the feedback from pre-testing.

Training of the data Collectors' team: Prior to the survey, AMIED and Virinchi Development Services provided rigorous training to supervisors and field investigators on the nature of interviews, instruments, questionnaires and specialised skills required for data collection. Two days of training were held. Both the team of AMIED and Virinchi Development Services facilitated the training. The data collection was overseen by Virinchi Development's senior core team.

Selection of Respondents

Following steps were taken in order to select the respondents:

1. All the children present during the day of data collection were selected for the assessment.
2. All the children were given Hindi, English and Mathematics papers to answer the questions as per their grade.

3. Classroom observation was done in all the schools to assess how the children are taught in the classroom.

3.4 Data Collection & Analysis

The data was collected through tests administered to students in Hindi, English, and Mathematics. The field staffs of AMIED evaluated the test papers filled out by the children in all three subjects and graded them based on their answers to each question.

Data was checked and cross-validated after the data collection process. The data was then entered by a team of data entry operators for further processing and analysis. A statistician was hired to create tables out of the cleaned data sets. These tables were then used to form findings and inferences for the study.

3.5 Process of Assessing Learning Level of Children

In all three disciplines, the distribution of marks was given equal weightage across different dimensions of the question papers. In each of the three papers, 10 points were awarded for each set of questions. For evaluating the children's learning levels, the SIQE norms were used. For both the levels, different grading system were adopted. Students from class 1 to 5 were given grades of 'A+', 'A', 'B', 'C', and 'D' based on their test scores. Those children who scored the marks from 91% to 100% were given Grade 'A+', those who obtained marks from 76% to 90%, 61% to 75%, 41% to 60% and 0% to 40% were given Grade 'A', 'B', 'C' and 'D' respectively. Students from class 6 to 8 were given grades of 'A', 'B', 'C', 'D' and 'E' based on their test scores. Those children who scored the marks from 86% to 100% were given Grade 'A', those who obtained marks from 71% to 85%, 51% to 70%, 31% to 50% and 0% to 30% were given Grade 'B', 'C', 'D' and 'E' respectively.

The question papers for all three subjects were assessed using the above-mentioned grading system and each student was graded based on their overall grading in Hindi, English, and Mathematics. Qualitative data analysis techniques were used to analyse the data. Excel was used to enter the quantitative data. The information gathered was placed through a computer programme. Numerical tables and relevant visuals have been used to present it. SPSS was used to examine the data.

Section-IV

FINDINGS AND ANALYSIS

This section of the report presents the result of the base line survey conducted with students at 14 schools of two blocks Ramgargh and Umrain of Alwar district of Rajasthan. The conclusions and inferences drawn from the collected data has been presented in detail in this section. The parts that follow will go through the results of the survey that was performed of all students in Hindi, English, and Mathematics.

Distribution of Respondents

Table 2 : Class wise distribution of percentage of students present		
Class	No of Students	% of Students
1	145	14%
2	160	16%
3	169	17%
4	178	18%
5	165	16%
6	70	7%
7	70	7%
8	48	5%
Grand Total	1005	100%

As shown in the above table 2, there were 145 students (14%) from class 1; total 160 (16%) students were from class 2; total 169 (17%) were from class 3, a total of 178 (18%) students were from class 4; a total of 165 (16%) were from class 5; a total of 70 students each from class 6 and 7 and a total of 48 students were from class 8. Sample was further analysed for class-wise gender segregation of the participant students which, is shown in the following figure 1.

As shown in the above table 2, Class 1 had 145 students (14%); class 2 had 160 (16%); class 3 had 169 (17%); class 4 had 178 (18%); class 5 had 165 (16%); and class 8 had 48 pupils. The sample was then further analysed for gender segregation of the participant students.

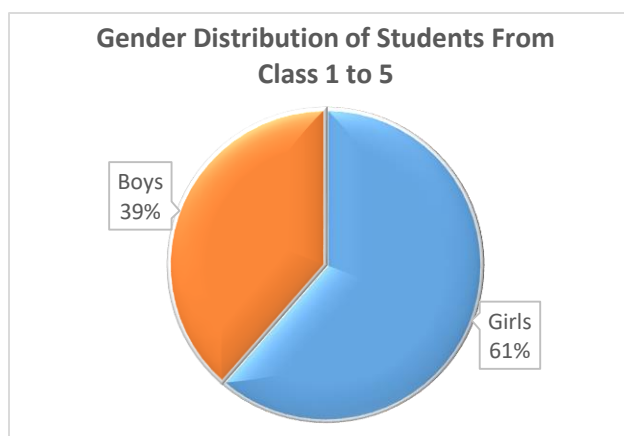

Figure 1: Gender Distribution of Students from Class 1 to 5

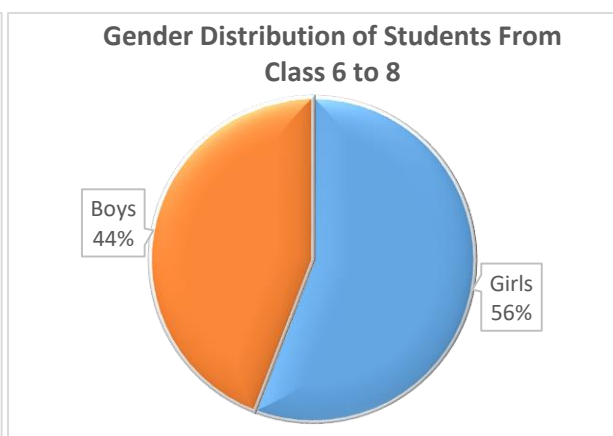

Figure 2: Gender Distribution of Students from Class 6 to 8

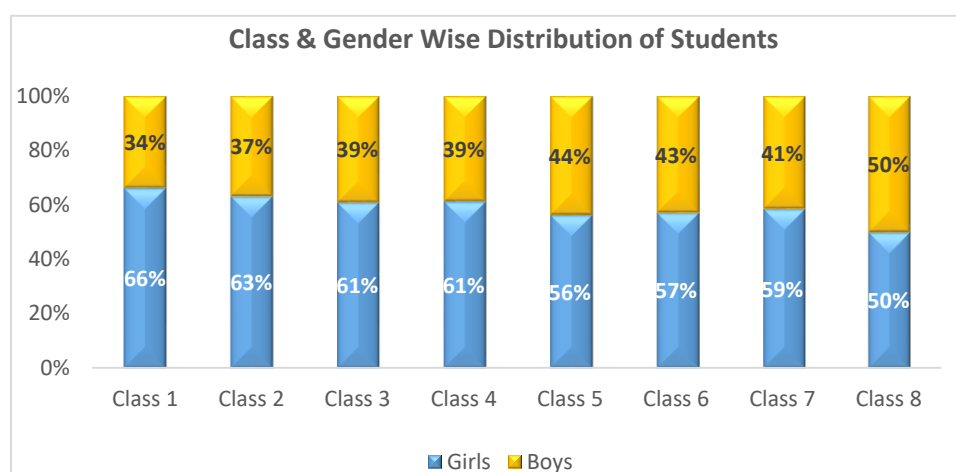

Figure 1: Class & Gender Wise Distribution of Students

As per the above graph, it can be easily seen that in most government schools, the ratio of girls in each class outnumbers the boys as per the attendance on the date of taking the test of the students. This, in some ways, reflects the project area's preference for males' education over girls' education. This may be due to boys are generally assigned to better-resourced private schools leaving girls with no choice but to attend under-resourced public schools or government schools. As a result, the project must take unique efforts to improve girls' education at project schools on the one hand, while also influencing community attitudes on the other.

4.1 Process of Assessing Learning Levels of Children

All the 1005 students were assessed for their language and numeracy Skills. Students were assessed for both English and Hindi languages taught in the project schools and also for

Mathematics. Based on the marks secured by students in question sets, they were awarded grade as per the SIQE norms. For evaluating the test papers of all the three subjects, the grading system adopted by the state government has been adapted by the research team. For grading the students studying from class 1-5, following grading system has been adopted.

Table 3: Grading Methodology for Students from Class 1 to 5

Sl. No.	Marks Obtained	Grade
1	91% - 100% marks	A+
2	76% -90% marks	A
3	61% -75% marks	B
4	41% -60% marks	C
5	0% -40% marks	D

For assessing the learning level of children studying in class 6 to 8, following grading system has been adopted.

Table 4: Grading Methodology for Students from Class 6 to 8

Sl. No.	Marks Obtained	Grade
1	86% - 100% marks	A
2	71% -85% marks	B
3	51% -70% marks	C
4	31% -50% marks	D
5	0% - 30% marks	E

All the students have been assessed accordingly. These findings are also crucial in determining the roadmap of interventions for the programme and key insights for the programme.

4.1.1 Gender wise Assessment of Students Overall (Hindi, English & Mathematics)

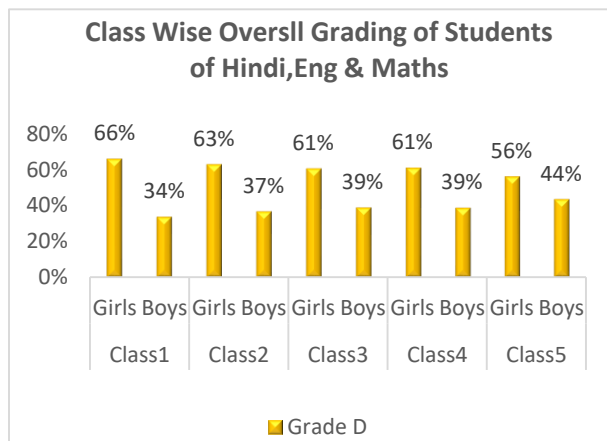

Figure 4: Overall Grading of Students of Hindi, Eng. & Math

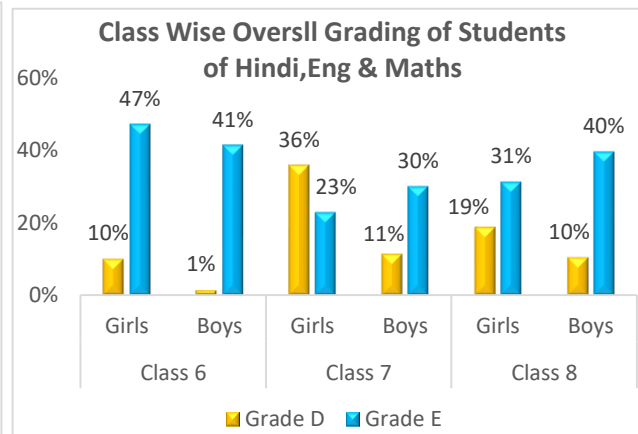

Figure 5: Overall Grading of Students of Hindi, Eng. & Math

From Class 1 to 5, 100% students (61% girls and 39% boys) fall in Grade D i.e. they got 0% -40% marks combining all three subjects Hindi, English & Math. 66% girls and 34% boys of class 1, 63% girls and 37% boys of class 2, 61% girls and 39% boys of class 3 and 4 and 56% girls and 44% boys of class 5 fall in this class category. From Class 6 to 8, 29% students (22% girls and 7% boys) fall in Grade D i.e. they got 31% -50% marks combining all three subjects Hindi, English & Math and 71% students (34% girls and 37% boys) fall in Grade E i.e. they got 0% -40% marks combining all three subjects. 57% girls and 43% boys of class 6, 59% girls and 41% boys of class 7, 50% girls and 50% boys of class 8 fall in this upper primary class category.

The gender wise analysis of the students done in Hindi, English and Mathematics for all the class groups. Though no specific pattern was found but boys performed marginally better than girls. This fact is evident as more percentage of girls fall in grade D from class 1 to 5 and in grade E from class 6 to 8.

4.2 Learning levels of Students in Hindi Language

These 1005 students were further assessed in Hindi language to understand their learning levels. Following Figures depicts the percentage of children falling in different grade. Hindi being the mother tongue and widely spoken language in India, every student must be well versed in reading, writing which naturally comes with good command over Hindi grammar.

4.2.1 Gender wise Assessment of Students in Hindi

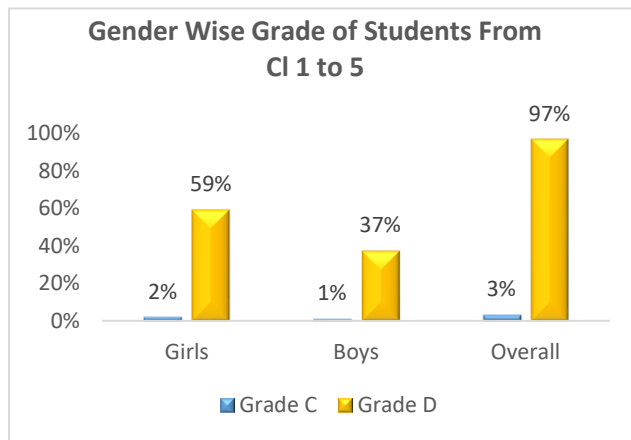

Figure 6: Gender Wise Grading of Students in Hindi

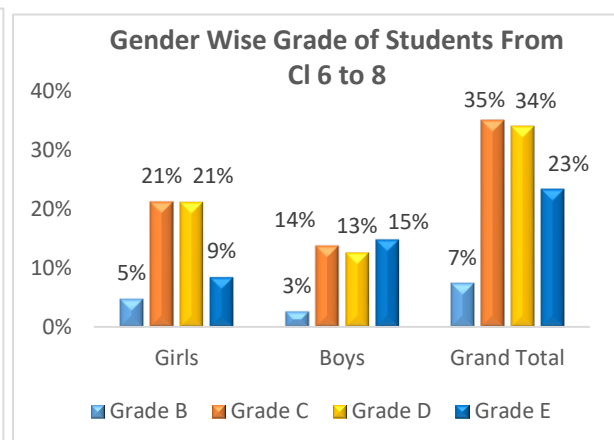

Figure 7: Gender Wise Grading of Students in Hindi

From Class 1 to 5, overall 3% students (2% girls and 1% boys) fall in Grade C and 97% students (59% girls and 37% boys) fall in Grade D category. Bizarrely, the majority of children (97%) fall in D grade even in their mother tongue (Hindi) which is a concern area for the students from class 1 to 5. For class 6 to 8, overall 7.4% students (4.8% girls and 2.7% boys) fall in Grade B, 35% students (21% girls and 14% boys) fall in Grade C, 34% students (21% girls and 13% boys) fall in Grade D, 23.4% students (8.5% girls and 14.9% boys) fall in Grade E category.

4.2.2 Class wise learning levels in Hindi

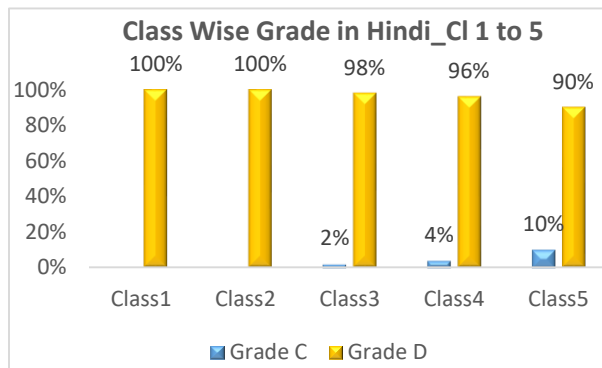

Figure 8: Class Wise Grade in Hindi from CI 1 to 5

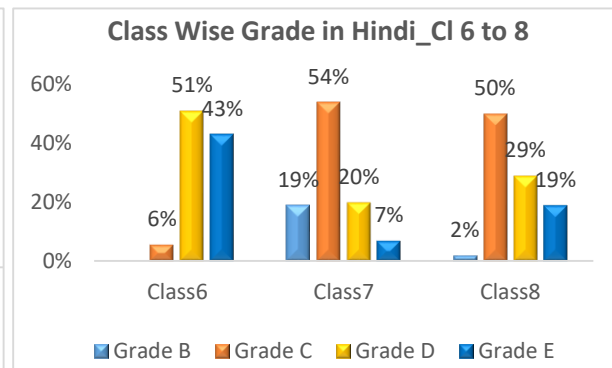

Figure 9: Class Wise Grade in Hindi from Class 6 to 8

Hindi is a major concern area for the students of class 1 to 5 as more than 90% students from each class fall in grade D i.e. they have got 0%-40% marks in Hindi. In Class 1 & 2, 100% students fall in grade D whereas in Class 3, it is 98%, class 4 it is 96% and class 5, 90% students fall in grade D. For class 6 to 8, the status is comparatively better but none of the students achieved grade A. Class 7 is the only grade where maximum 19% students fall in Grade B and 54% in grade C. Class 6 is the grade where more focus on Hindi would be required as 94% fall in grade D&E (51% grade

D & 43% grade E) followed by class 8 where 48% fall in grade D&E (29% in grade D & 19% in grade E).

4.2.3 Performance of Students in Reading, Writing & Grammar in Hindi

Language is our primary source of communication. It's the method through which we share our ideas and thoughts with others. Every student must have proper knowledge of Hindi. For language paper, students are judged majorly on the skills like reading, writing, speaking and listening. All of these skills are interrelated and affect one another. Grammar again plays an important role in language learning as it guides a student how to write and speak correctly. Nevertheless, all these language skills with reading and writing play an important role in ensuring improved school performance. It is important to mention here that in Class 1 and 2, no question related to grammar was asked as the school education up to this level focuses on reading, writing, speaking and listening skills only.

4.2.4 Reading Skill of Children in Hindi from Class 1 to 8

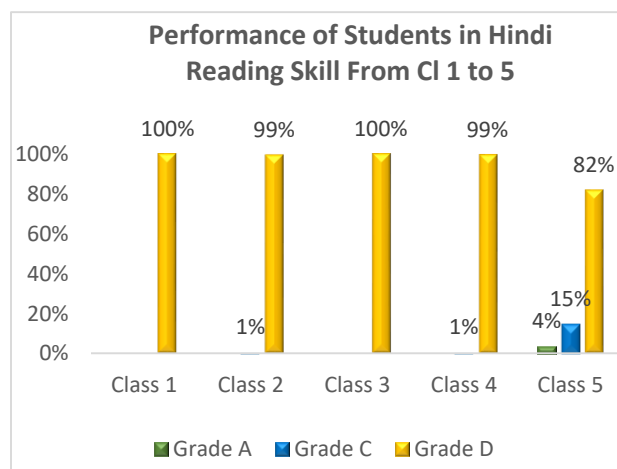

Figure 10: Performance of Students in Hindi Reading Skill

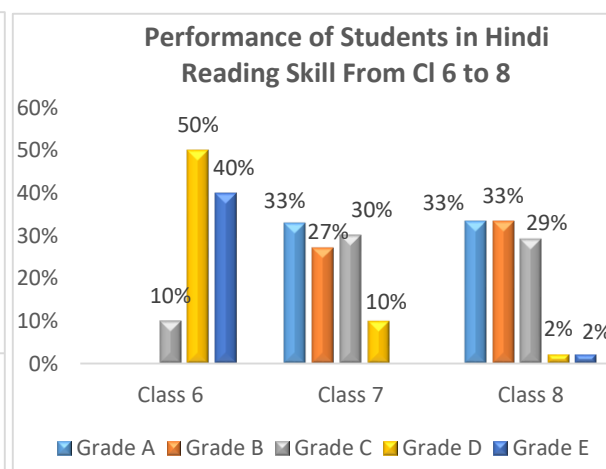

Figure 11: Performance of Students in Hindi Reading Skill

As per the figure, it clearly depicts that the students from class 1 to 4 are very poor as around all of them got the marks between 0 to 40% (grade D). There is only one student from class 2 and 4 who got grade C otherwise all the students fall in grade D. Class 5 is the only grade where 6 students (4%) fall in grade A, 24 students (15%) fall in grade C and 82% students fall in grade D. For the class 6 to 8, students of class 6 are poorer than other classes as 90% (50% grade D & 40% Grade E) students fall in grade D&E. Students of class 7&8 are better than any other class as 33% students each from class 7&8 fall in grade A, 27% students from class 7 & 33% students

from class 8 fall in grade B, 30% students from class 7 & 29% students from class 8 fall in grade C, 10% students from class 7 & 2% students from class 8 fall in grade D whereas 2% students only form class 8 fall in grade E.

4.2.5 Writing Skill of Children in Hindi from Class 1 to 8

School is the place where the students acquire a number of key skills which are taught in classrooms from elementary level through college so that they can efficiently handle and address the real-life problems when faced in future. Among these skills, one skill is writing which is unquestionably one of the most crucial talents that every student should master. As Hindi is most commonly spoken and written language, hence every student must hone their writing skill of Hindi very well.

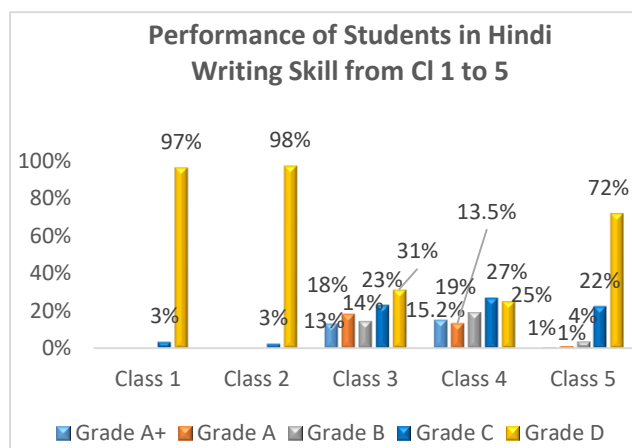

Figure 12: Performance of Students in Hindi Writing Skill

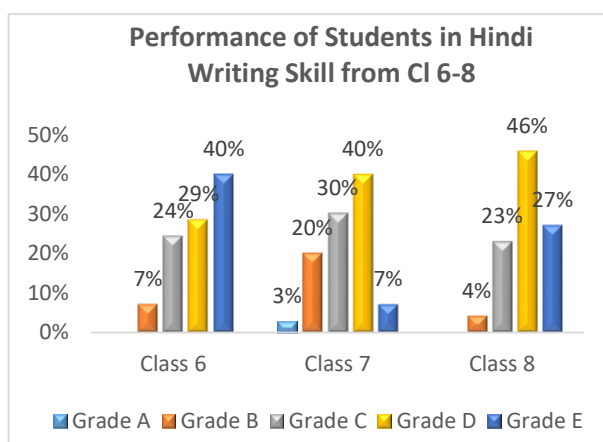

Figure 13: Performance of Students in Hindi Writing Skill

From the above graph, it clearly depicts that the students of class 1 and 2 are very weak in Hindi writing as 97% students of class 1 and 98% students of class 2 fall in grade D. Students of class 4 and class 3 seem comparatively good as 15% students of class 4 and 13% of class 3 fall in A+ grade, 13% students of class 4 and 18% of class 3 fall in A grade, 19% students of class 4 and 14% of class 3 fall in B grade, 27% students of class 4 and 23% of class 3 fall in C grade whereas one fourth students of class 4 and one third students of class 3 fall in D grade. Among the students of class 1 to 5, position of class 5 students is not good as 72% students fall in grade D, 22% in grade C, 4% in grade B, 1% in grade A and A+ each. From class 6 to 8, students of class 7 came up as best as the least students (7%) fall in grade E, 40% in grade D, 30% in grade C, 20% in grade B, and 3% in grade A whereas 40% students of class 6 fall in grade E, 29% in grade D, 24% in grade C & 7% in grade B. For class 8, 27% fall in grade E, 46% in grade D, 23% in grade C & 4% in grade B.

4.2.6 Understanding of Functional Grammar in Hindi from Class 1 to 8

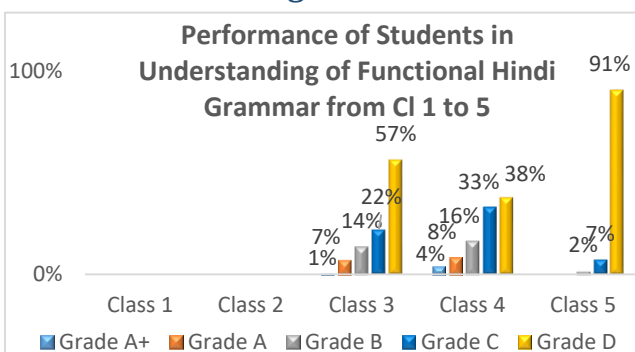

Figure 14: Performance of Students in Understanding of Functional Hindi Grammar from Class 1 to 5

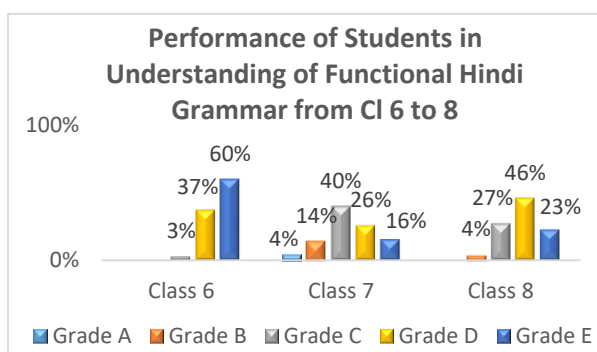

Figure 15: Performance of Students in Understanding of Functional Hindi Grammar from Class 6 to 8

The assessments of functional understanding of grammar for these: Students were assessed. At the primary level, majority of the students secured D grade as 57% students of class 3, 38% of class 4 and 91% of class 5 fall in grade D. It is to be mentioned here that Hindi Grammar has not been included in grading for class 1 and 2 as it is not the part of curriculum. The slightly better situation is with students of class 6 to 8 where 60% students of class 6 fall in grade E and 37% in grade D, 16% students of class 7 fall in grade E and 26% students fall in grade D whereas 23% students of class 8 fall in grade E and 46% students fall in grade D. The above analysis has a lot of potential for creating individual learning plans (ILPs) for students with various Hindi language skills. Together with subject teachers, the project team can use this data to create ILPs for students. However, when employing group work for customised learning, SMs and subject instructors can use class-level data on student grades and percentages to inform them about the compositions of different groups in the classroom.

4.3 Learning Levels of Students in English Language

These students were further assessed in English language to understand their learning levels of reading, writing and grammar of English. English has always been described as the language of opportunity. Now a day, learning English has become almost must for every student as it is one of the most widely spoken language throughout the world. Knowing good English opens opportunities for the students when they grow up.

4.3.1 Gender wise Assessment of Students in English

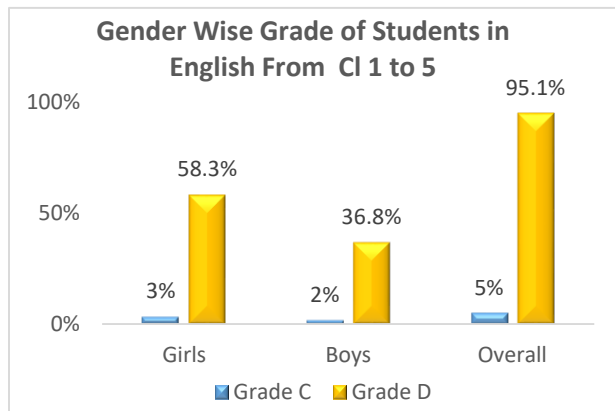

Figure 16 Gender Wise Grade of Students in English from CI 1 to 5

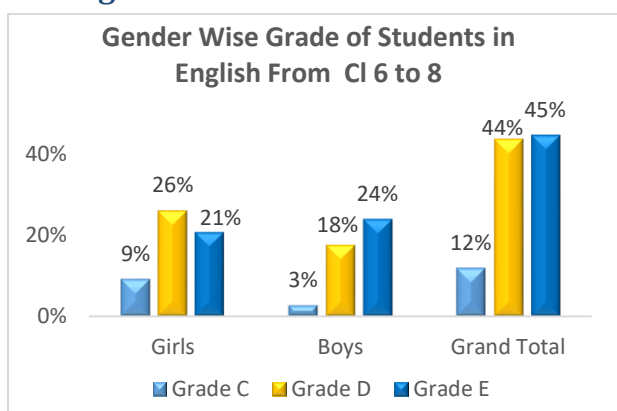

Figure 17: Gender Wise Grade of Students in English from CI 6 to 8

From Class 1 to 5, overall 5% students (3% girls and 2% boys) fall in Grade C and 95% students (58% girls and 37% boys) fall in Grade D category. As majority of children (95%) got below 40% marks hence, it is a concern area for the students from class 1 to 5. For class 6 to 8, overall 12% students (9% girls and 3% boys) fall in Grade C, 44% students (26% girls and 18% boys) fall in Grade D, 45% students (21% girls and 24% boys) fall in Grade E category.

4.3.2 Class wise Learning Levels in English

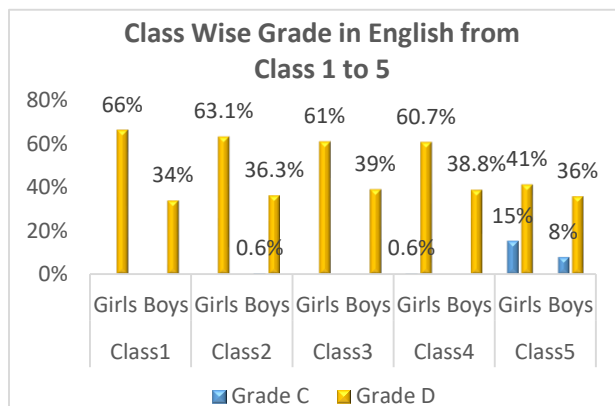

Figure 18: Class Wise Grade in English from Class 1 to 5

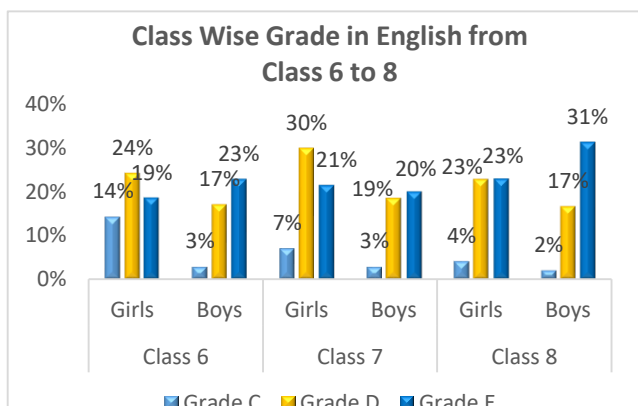

Figure 19: Class Wise Grade in English from Class 6 to 8

English as a language is also a major concern area for all the students especially from class 1 to 5 as more than 90% students from each class fall in grade D i.e. they have got 0%-40% marks in English except students of class 5 where 77% students fall in grade D and 23% in grade C. For class 6 to 8, the status is comparatively better but none of the students achieved grade A and even B. Class 6 is the only grade where maximum 17% students fall in Grade C. 41% students of

this class fall each in grade D and grade E. Class 7 follows class 6 where 10% students fall in Grade C, 49% students fall in grade D and grade 41% fall in grade E. Performance of students of class 8 is comparatively very poor among students of class 6 to 8 as 54% students fall in grade E, 40% fall in grade D and only 6% students fall in grade C.

4.3.3 Performance of Students in Reading, Writing and Grammar in English

Seeing the present scenario, importance of English can't be ignored where reading, writing, and speaking are equally important. Grammar is the base of all these as it guides a student how to write and speak correctly and hence interrelated and affect one another. Here, in English as a language paper, students are judged on the skills like reading, writing and grammar. It is obvious that the students with good command on language has the improved school performance. Here, it is also important to mention that grammar is not covered for class 1 and 2 as the school education focuses on reading, writing, speaking and listening skills only up to these levels.

4.3.4 Reading Skill of Children in English from Class 1 to 8

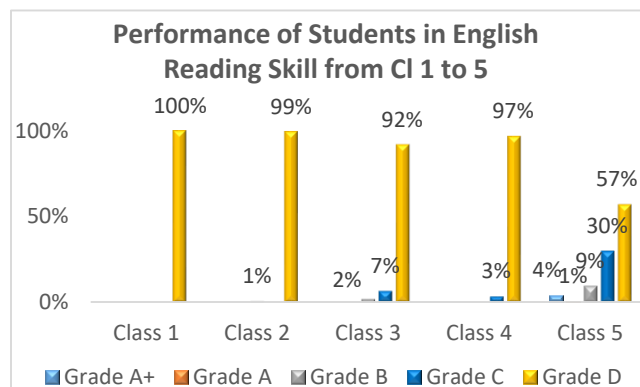

Figure 20: Performance of Students in English Reading Skill

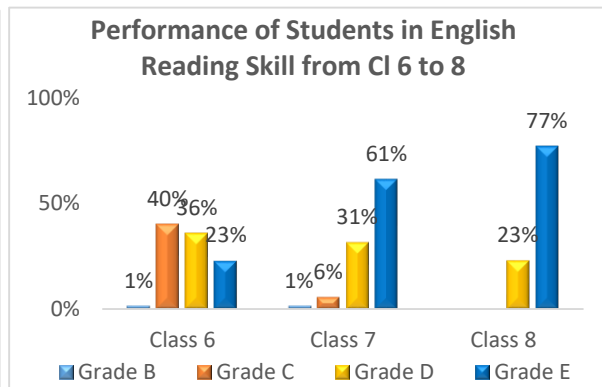

Figure 21: Performance of Students in English Reading Skill

For the classes 1 to 4, more than 90% students fall in grade D. Class 5 is the only grade where students fall in all grades. 4% students of class 5 fall in grade A+, 1% in grade A, 9% in grade B, 30% in grade C and 57% students fall in grade D. From class 6 to 8, students of class 6 appeared as better performer than other students. 23% students of class 6 fall in grade E, 36% in grade D, 40% in grade C and 1% in grade B. For class 7, 61% students of fall in grade E, 31% in grade D, 6% in grade C and 1% in grade B whereas for class 8, 77% students fall in grade E and 23% in grade D. This clearly shows that as the grade of students increases, their performance decreases as 100%

students of class 8, 93% students of class 7 and around 60% students of class 6 got below 50% marks in English reading.

4.3.5 Writing Skill of Children in English from Class 1 to 8

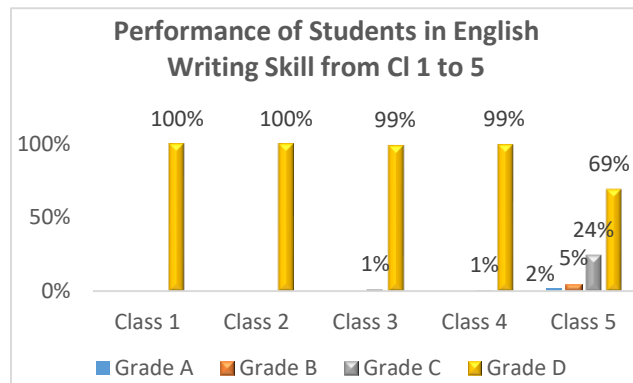

Figure 22: Performance of Students in English Writing Skill

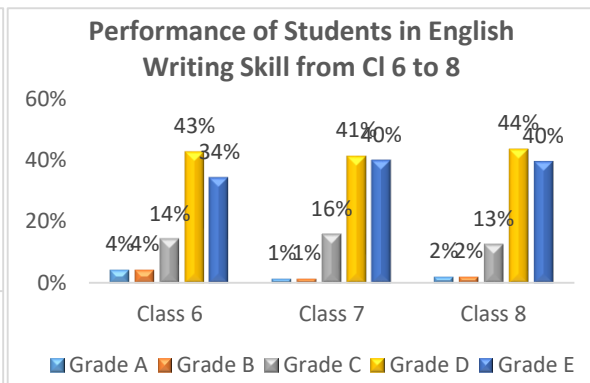

Figure 23: Performance of Students in English Writing Skill

Writing skill of students in English is in grim situation especially for the students of class 1 to 5 where around 99% students from class 1 to 4 got less than 40% whereas for class 5, 2% students fall in grade A, 5% students fall in grade B, 24% students fall in grade C and 69% students fall in grade D. For class 6 to 8, situation is comparatively better where students fall in all grades. For class 6, 4% Students each fall in grade A and B, 14% in grade C, 43% in grade D and 34% students fall in grade E whereas for class 7, 1% Students each fall in grade A and B, 16% in grade C, 41% in grade D and 40% students fall in grade E and for class 8, 2% Students each fall in grade A and B, 13% in grade C, 44% in grade D and 40% students fall in grade E.

4.3.6 Understanding of Functional Grammar of Children in English from CI 1 to 8

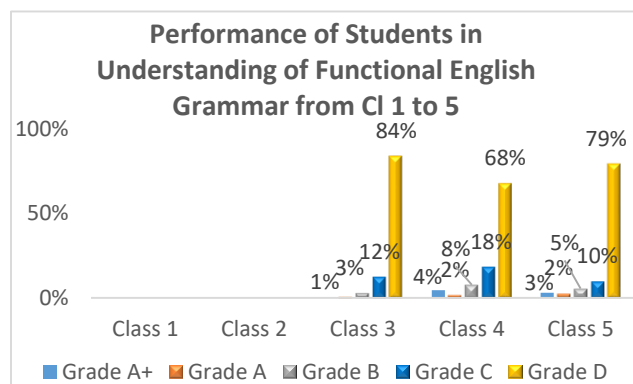

Figure 24: Performance of Students in Understanding of Functional English Grammar from Class 1 to 5

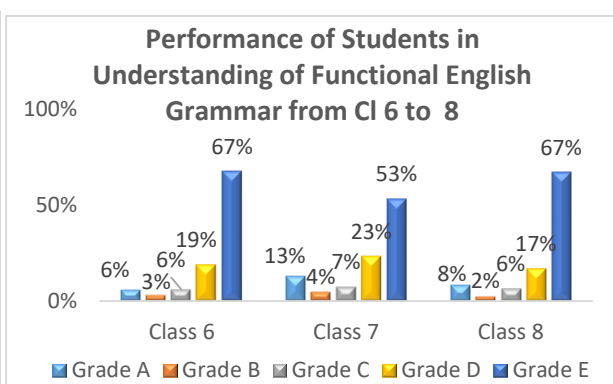

Figure 25: Performance of Students in Understanding of Functional English Grammar from CI 6 to 8

For Class 1 to 5, students of class 3 are found to be very weak in English grammar followed by class 5 and class 4 respectively as 84% students of class 3, 79% students of class 5 and 68% students of class 4 got less than 40% marks i.e they fall in grade D, though 4% students of class 4 and 3% students of class 5 fall in grade A+, 2% students each from of class 4 and 5 fall in grade A, 8% students of class 4 and 5% students of class 5 fall in grade B, 18% students of class 4 and 10% students of class 5 fall in grade C. For class 6 to 8, students of class 7 are found to be more sound in English grammar than other students as 13% students of class 7 fall in grade A whereas 8% students of class 8 and 6% students of class 6 fall in grade A. 4% students of class 7 fall in grade B whereas 3% students of class 6 and 2% students of class 8 fall in grade B category and 7% students of class 7 and 6% students each of class 6 and 8 fall in grade C. 23% students of class 7, 19% students of class 6 and 17% students of class 8 fall in grade D whereas least 53% students of class 7 and 67% students each of class 6 and 8 fall in grade E i.e they got less than 30% marks.

4.4 Learning Level of Students in Mathematics

Mathematics is a study of measurements, numbers, and space, which is one of the first sciences that humans work to develop because of its great importance and benefits. Mathematics is the pillar of organized life for the present day. Without numbers and mathematical evidence, we cannot resolve any issues in our daily lives. It is aimed for children to be able to connect mathematics to everyday activities. It is about developing basic abilities while learning mathematics and applying it to real-life circumstances. Though the importance of Mathematics can never be denied, a general fear of dealing with math exists in students across the world. Students were evaluated on their arithmetic ability, number knowledge, geometry knowledge, and how they used math in their daily lives.

4.4.1 Gender wise Assessment of Students in Mathematics

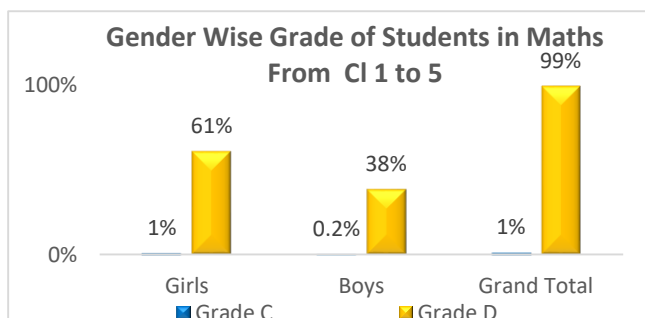

Figure 26: Gender Wise Grade of Students in Mathematics

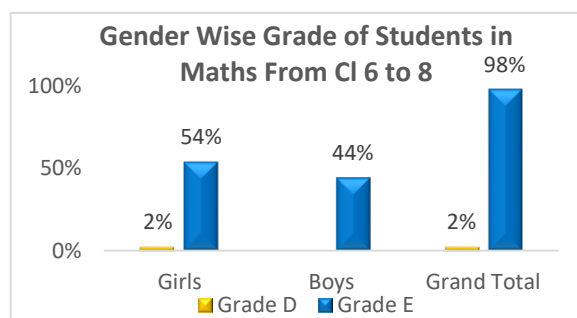

Figure 27: Gender Wise Grade of Students in Mathematics

It is evident from the above figures that majority of students have failed to secure even passing marks. These students got the lowest grade during the assessment survey. Overall, 99% students of class 1 to 5 fall in grade D and 98% students from class 6 to 8 fall in Grade E. These students got the lowest grade during the assessment survey. A mere 1% secured grade C from class 1 to 5 and 2% scored grade D from class 6 to 8.

A significant pedagogical intervention is required in order to improve the current state of students' learning levels. Additional analysis in the parts below will be relevant for specific pedagogical interventions in everyday life.

4.4.2 Class wise Learning Level of Children in Mathematics

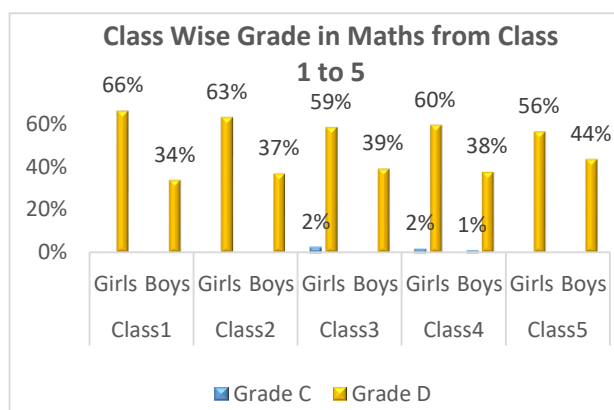

Figure 28: Class Wise Grade in Mathematics from Class 1 to 5

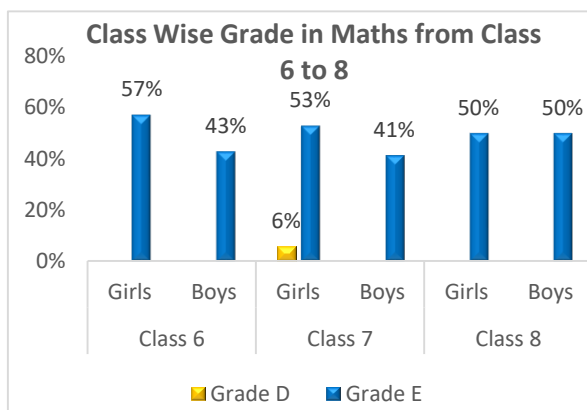

Figure 29: Class Wise Grade in Mathematics from Class 6 to 8

100% Students of class 1, 2 and 5 got less than 40% marks in Mathematics whereas 98% Students of class 3 and 97% students of class 4 got less than 40%. Only 2% (all girls) students of class 3 and 3% students (2% girls and 1% boys) of class 4 fall in grade C that they got the marks between 40% to 60%. For the class 6 to 8, 100% students of class 6 and 8 did not even get the passing marks of 30% and fall in grade E whereas 94% (53% girls and 41% boys) students of class 7 did not get the passing marks and only 6% students (all girls) managed to get 30% to 50% marks and fall in grade D. This clearly indicates that students of all classes are very weak in Mathematics and need immediate intervention.

4.4.3 Understanding of Numeracy, Calculation, Geometry & Application of Mathematics in Daily Life

Students crack several problems relating to other disciplines during their academic studies, hence it is critical that they are proficient in mathematics. If students wish to improve their chances of academic success in the future, they must understand the fundamentals of Mathematics. Emphasizing Mathematics from very beginning will provide children with a strong basis for reasoning, estimation and thinking logically in later life. Hence, students must have sound understanding of numeracy, calculation, geometry and application of Mathematics in their daily life.

4.4.4 Performance of Children in Understanding of Numeracy

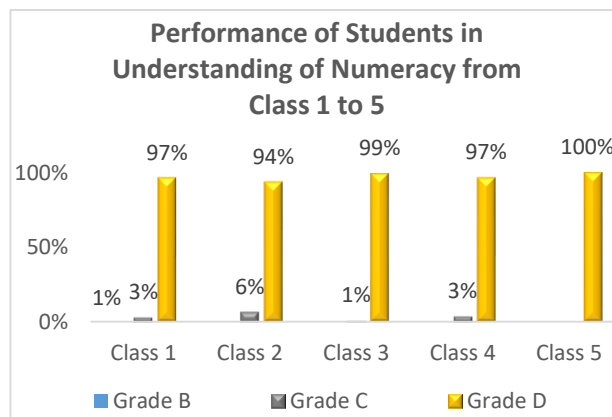

Figure 30: Performance of Students in Understanding of Numeracy from Class 1 to 5

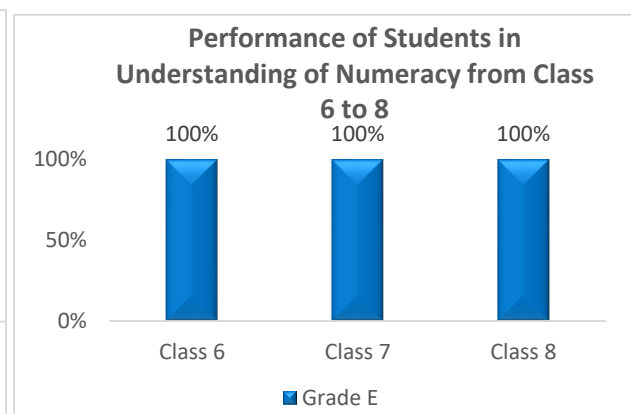

Figure 31: Performance of Students in Understanding of Numeracy from Class 6 to 8

It is evident from the above figures that students need very much improvement in this section as well. For class 1, 97% students fall in grade D, 3% in grade C and 1% in grade B and for class 2, 94% students fall in grade D and 6% in grade C. For class 3, 99% students fall in grade D and 1% in grade C. For class 4, 97% students fall in grade D and 3% in grade C whereas 100% students of class 5 fall in grade D. Similarly, for class 6 to 8, 100% students fall in grade E i.e. they did not get even the passing marks of 30%.

4.4.5 Performance of Children in Understanding of Calculation in Mathematics

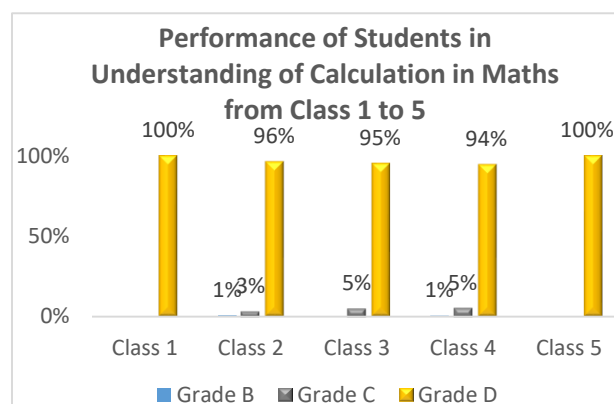

Figure 32: Performance of Students in Understanding of Calculation in Mathematics from Class 1 to 5

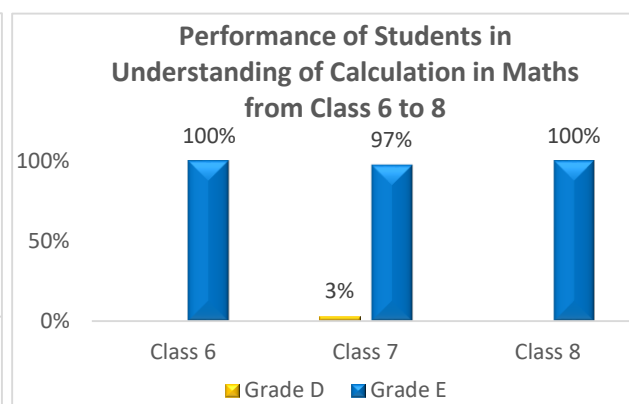

Figure 33: Performance of Students in Understanding of Calculation in Mathematics from Class 6 to 8

Having a good understanding of calculations is a must for every student if he/she wants to excel and wants a good performance in Mathematics. For class 1 to 5, it is observed that majorly students fall in grade D. 100% students of class 1 and 5 fall in grade D, 96% students of class 2 fall in grade D, 3% in grade C and 1% in grade B, 95% students of class 3 fall in grade D and 5% in grade C and 94% students of class 4 fall in grade D, 5% fall in grade C and 1% fall in grade B. Situation of students of class 6 to 8 is very grim as 97% students of class 7 and 100% students of class 6 and 8 did not get even the passing marks of 30% i.e. they fall in grade E and 3% students of class 7 fall in grade D.

4.4.6 Performance of Children in Understanding of Geometry in Mathematics

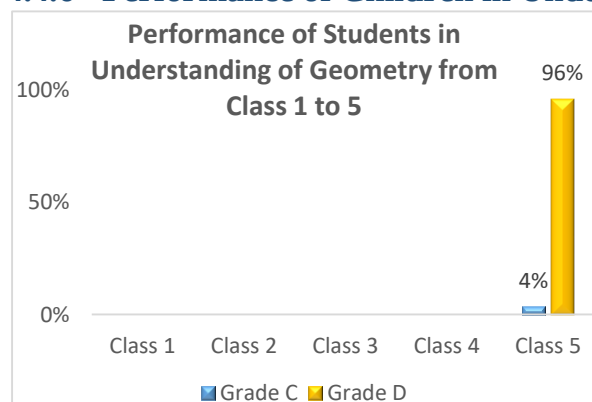

Figure 34: Performance of Students in Understanding of Geometry from Class 1 to 5

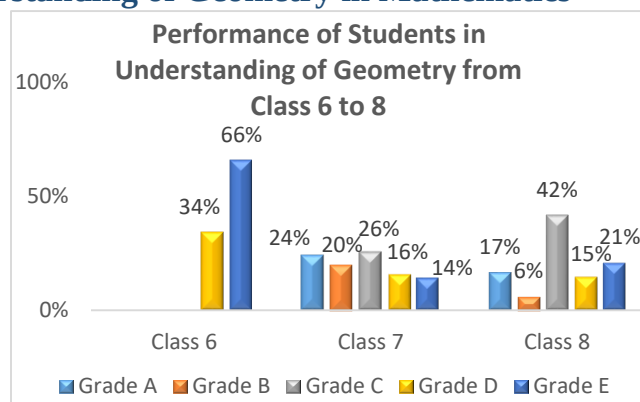

Figure 35: Performance of Students in Understanding of Geometry from Class 6 to 8

Geometry is defined as the area of mathematics dealing with points, lines, shapes and space. Geometry is important because the world is made up of different shapes and spaces. At a basic level, geometry is important to learn because it creates a foundation for more advanced

mathematical learning. It helps children in understanding of spatial relationships which is very important in honing the problem solving and higher order thinking skills. Geometry as subject is found comparatively better for the students of higher classes as 7 and 8. 96% students of class 5 fall in grade D i.e. they got the marks below 40% and 4% students fall in grade C i.e. they got marks between 40% to 60%. 66% students of class 6 fall in grade D and 34% students fall in grade C. For class 7 and 8, students fall in each category. Highest 24% students of class 7 fall in grade A, 20% in grade B, 26% in grade C, 16% in grade D and 14% students fall in grade E who did not get even the qualifying marks of 30% whereas 17% students of class 8 fall in grade A, 6% in grade B, 42% in grade C, 15% in grade D and 21% students fall in grade E. It is important to mention here that Geometry is not included in subject curriculum from class 1 to 4.

4.4.7 Performance of Children in Understanding of Application of Mathematics in Daily Life

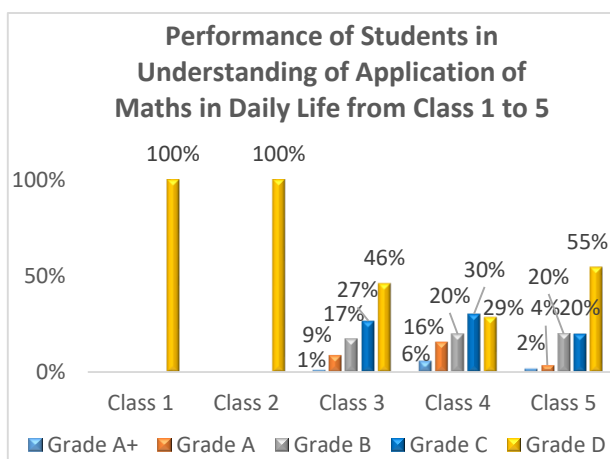

Figure 36: Performance of Students in Understanding of Application of Mathematics in Daily Life from Class 1 to 5

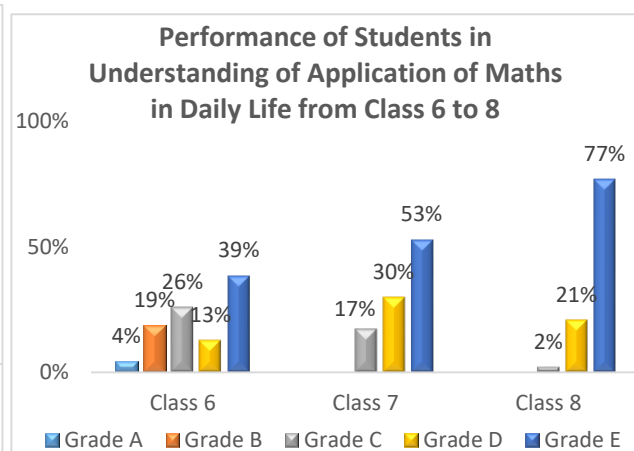

Figure 37: Performance of Students in Understanding of Application of Mathematics in Daily Life from Class 6 to 8

Mathematics plays an important role in developing sound logic and thoughts. It gives an effective way to create mental discipline and increases logical reasoning. Moreover, mathematical knowledge plays an essential role in understanding the concept of other subjects like science, social studies, and even music and art. Hence, its application in daily life paves a path to analyze, describe, and change things. All students of class 1 and 2 fall in grade D. 1% student of class 3 fall in grade A+, 9% in grade A, 17% in grade B, 27% in grade C and 46% students fall in grade D. For class 4, 6% students of class 4 fall in grade A+, 16% in grade A, 20% in grade B, 30% in grade C and 29% students fall in grade D whereas 2% students of class 5 fall in grade A+, 4% in grade A,

20% in grade B, 20% in grade C and 55% students fall in grade D. From students of class 6 to 8, performance of students of class found to be better than other students as 4% students of class 6 fall in grade A, 19% in grade B, 26% in grade C, 13% in grade D and 39% students fall in grade E i.e. they did not get even the passing marks of 30% marks. No student was able to get more than 70% marks in class 7 and 8. 17% students of class 7 fall in grade C, 30% in grade D and 53% in grade E whereas 2% students of class 8 in grade C, 21% in grade D and 77% students fall in grade E.

Section-V

5.1 RECOMMENDATIONS & CONCLUSIONS

The results and analysis of the baseline survey data for the students of class 1 to 8 allow critical insights for the programme to be drawn. The results of the baseline survey lead to particular interventions and actions that must be implemented during the programme phase in order to meet the project's stated objectives. This part outlines the main conclusions that can be made from the preceding sections' analysis. Below are specific recommendations for certain components.

Compensatory/Remedial Education

- For making the foundation more stronger of the weaker students, schools should establish remedial learning classes. The majority of children's learning results might be improved by improving their abilities and motivation to excel in school.
- For weaker students, remedial classes should be scheduled in stages. Teachers, students, and parents should come on a single platform on the scheduling and duration of the remedial classes so that weaker students can attend lessons on a regular basis.
- Shiksha Mitras must be trained on how to deal with pupils who have received the lowest grade during remedial lessons.
- For each subject, more structured lesson plans for Shiksha Mitras and instructors should be prepared so that Shiksha Mitras and teachers may equally handle groups.
- Individual assessment can be used by the project team, particularly Shiksha Mitra, to produce individual learning plans (ILPs) for students in collaboration with topic teachers. Nonetheless, while employing group work for personalised learning, class-level performance of students and composition of different groups in the classroom can be informed to the topic teachers.
- Learning levels should be monitored at regular intervals for each student in the school, as well as during remedial programmes.
- Reading, writing, and grammar skills in both languages must be prioritised by the project team. Calculation and application of mathematical principles must be prioritised in Mathematics as students are found much more improvement in this. It is strongly advised

that activity-based learning should be developed, as well as the adaption of personalised learning plans and the usage of worksheets.

- Though Hindi being the mother tongue and most spoken language, students are found very weak in Hindi and hence, require a lot of focus to improve the students in Hindi grammar, reading and writing skill. A special focus to be given in Hindi in remedial classes as well as in classroom sessions.
- Because the majority of students have lower learning levels in English, more time should be spent in remedial classes as well as in classroom sessions. It is necessary to place a greater emphasis on the fundamentals of English so that children can begin reading and writing at the appropriate level for their classes.

Grouping of Students

- Students can be classified into groups based on reading, writing, and functional grammar in Hindi and English classes. When it comes to reading, these levels can range from 'beginning' (those who are unable to recognise letters) to 'intermediate' (those who can recognise letters) to 'advanced' (those who can recognise words, phrases, and paragraphs) to 'advanced' (those who can read and comprehend).
- The degrees of arithmetic can range from number recognition to operations such as addition, subtraction, multiplication, and division. This necessitates individualising instruction and learning for each student.
- Teachers must be well-trained, well-resourced, and have a good attitude toward multi-grade teaching so that students can learn effectively in a multi-grade classroom. They must be trained on current pedagogy and on few teaching and learning tools. Teachers should have specialised training in teaching multi-grade skills as well.

Teaching & Learning

- Teachers' knowledge on different subjects can be developed in tandem with pedagogical approaches through a systematic approach. From the beginning, they must seek the help of the school principal in trainings.

- The SIQE guidelines should be used to train teachers and project workers in pedagogical skills.
- Efforts should be taken to ensure that children have access to fun learning tools, as well as to provide teachers with guidance on how to use these resources for the benefit of their students' learning and development.
- Rather than relying just on classroom activities, teachers should employ a variety of methods, including oral, project, presentation i.e they should shift themselves from traditional to more child-centered teaching approaches.
- Teachers must be educated on the value of fearless learning so that students can be more engaged in the learning process. The RTE Act already prohibits punitive measures and instructors must be educated on the necessity of creating a fearless learning atmosphere. During a study it was found that students from all schools are afraid of their teachers, which could affect a difficulty in enhancing the children's learning outcomes.
- Assessments should be viewed as a diagnostic tool for determining what needs to be focused or changed. Teachers and students will benefit from tracking and analysing data based on the various aspects of a concept taught like application, knowledge, understanding etc. as well as taking remedial actions based on it.
- The system should be developed in such a way so that regular workshops and trainings for HMs and teachers at the district level to be conducted before they begin applying SIQE in their classrooms in the new session. They will only be able to properly use SIQE in their classes if they receive practical training on how to do so. Workshops and trainings will provide practical experience with SIQE implementation. It would also allow them to interact with specialists and other instructors, allowing them to share their issues and find solutions for improving the learning outcomes of their students.
- Parent Teacher Meet (PTM) should be mandated in every school as it would increase teacher's accountability as well as parents' interest to endow in education. This would ultimately help in improving the learning outcomes of the children.

- Advocacy is needed to hold education providers (line department officials, school administrators, teachers, and other stakeholders) accountable for meeting the goal as the study indicated that HMs and other officials had a low level of accountability.

School Management Committee

- SMCs must be strengthened in all schools. To prevent conflict and maintain the smooth operation of SMCs, instructors and HMs should work together during SMC reconstitution.
- Members of the SMC should be educated on matters concerning educational quality.
- Local campaigning with schools is essential to make SMCs viable and participatory.
- Every school must have a school development plan (SDP)
- Trainings for developing SDPs should be conducted before the annual planning cycle begins, so that members have enough time to learn about their school's needs and develop a plan in time for the annual planning cycle.
- Plan needs to build rapport with district level officials so that the SDPs are collated and integrated into the district's planning
- As parents and other family members behaviour has a great impact on children's learning, there is a need to encourage them to spend more time with their son/daughter doing different engagement activities that help them to learn. SMs should meet with parents on a frequent basis so that they are more involved in their children's education.

Infrastructure

- Improved school infrastructure, including renovated spaces, allows children to study and, as a result, increases student and staff attendance and enthusiasm in learning. School infrastructure should be strengthened by advocacy activities such as the development and strengthening of libraries, the provision of green boards, science labs, sports equipment etc.
- There is also a need to campaign for improved school infrastructure, particularly in terms of basic amenities such as drinking water and separate toilets for girls and boys.

Other

- Bal Sansads should be democratically constituted and then strengthened.
- The programme has to step up its lobbying efforts with policymakers for a more balanced teacher-to-student ratio in practise at the school level as this is one of the most difficult problems in enhancing educational quality, as teachers may not be able to engage all students in large classrooms.
- Teachers should not be swamped with more paperwork. Methods must be established in which the school employs a mechanism to evenly distribute non-teaching responsibilities.

Annexures

1) Overall Grading of Students

Overall Grading of Students				
Sl. No.	Name of the School	Name of Student	Class	Overall Grading of Students
1	GGSSS Ramgargh	Aasifa	1	D
